Workflow

Mindmap Diretory Project

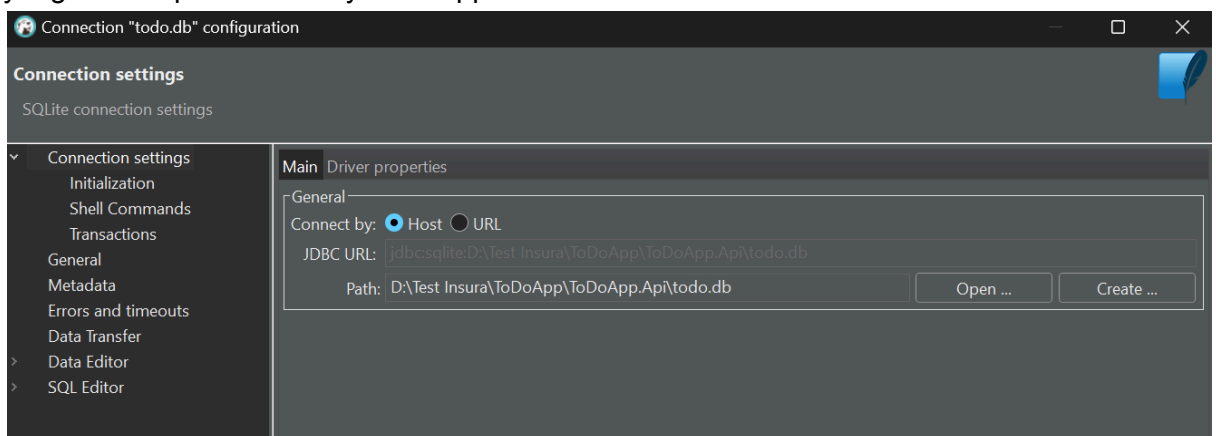

Setup Aplikasi

1. Clone project todoapp dari github (<https://github.com/maul97siregar/ToDoApps.git>)
2. Buka terminal pada root directory project, lalu ketik command "dotnet ef database update"

```
PS D:\Test Insura\ToDoApp\ToDoApp.Api> dotnet ef database update
Build started...
Build succeeded.
The Entity Framework tools version '8.0.6' is older than that of the runtime '8.0.8'. Update the tools for the latest features and bug fixes. See https://aka.ms/AAC1fbw for more information.
info: Microsoft.EntityFrameworkCore.Database.Command[20101]
      Executed DbCommand (6ms) [Parameters=[], CommandType='Text', CommandTimeout='30']
      SELECT COUNT(*) FROM "sqlite_master" WHERE "name" = '__EFMigrationsHistory' AND "type" = 'table';
info: Microsoft.EntityFrameworkCore.Database.Command[20101]
      Executed DbCommand (0ms) [Parameters=[], CommandType='Text', CommandTimeout='30']
      SELECT COUNT(*) FROM "sqlite_master" WHERE "name" = '__EFMigrationsHistory' AND "type" = 'table';
info: Microsoft.EntityFrameworkCore.Database.Command[20101]
      Executed DbCommand (1ms) [Parameters=[], CommandType='Text', CommandTimeout='30']
      SELECT "MigrationId", "ProductVersion"
      FROM "__EFMigrationsHistory"
      ORDER BY "MigrationId";
info: Microsoft.EntityFrameworkCore.Migrations[20405]
      No migrations were applied. The database is already up to date.
No migrations were applied. The database is already up to date.
Done.
PS D:\Test Insura\ToDoApp\ToDoApp.Api>
```

3. Setelah melakukan update, untuk memastikan silahkan buka dbeave, laragon, etc untuk connection database. Disini saya menggunakan DbEaver. Jangan lupa untuk arahkan file db yang berada pada directory ToDoApp.API/todo.db

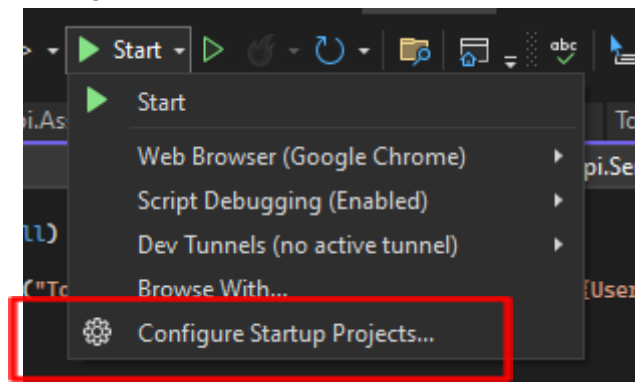

4. Test Query

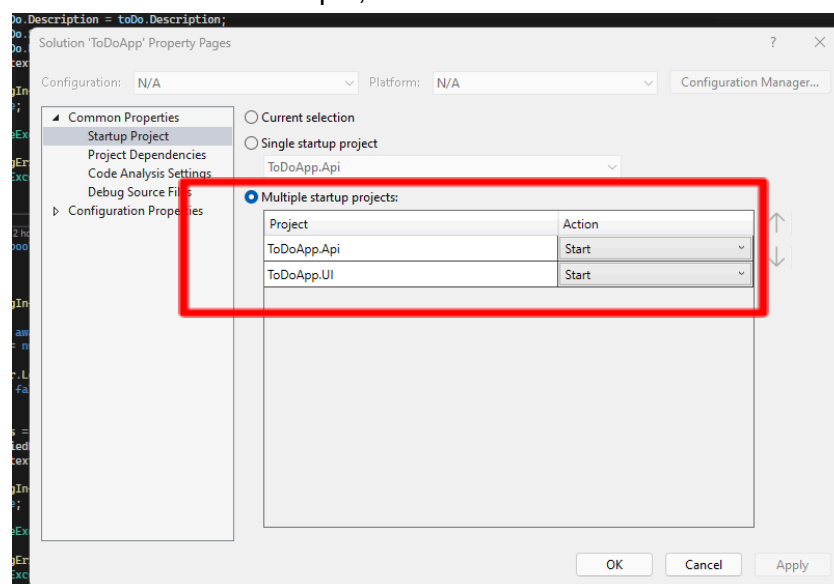

5. Buka folder directory project tersebut melalui Visual Studio atau boleh langsung klik file .sln

Name	Date modified	Type	Size
.github	10/5/2024 4:29 PM	File folder	
data-protection-keys	10/4/2024 4:06 PM	File folder	
Screenshoot	10/6/2024 7:41 PM	File folder	
ToDoApp.Api	10/6/2024 10:18 PM	File folder	
ToDoApp.UI	10/6/2024 10:21 PM	File folder	
.dockerignore	10/5/2024 2:21 AM	DOCKERIGNORE File	1 KB
.gitignore	10/6/2024 8:21 PM	Git Ignore Source File	1 KB
docker-compose	10/6/2024 9:57 PM	Yaml Source File	1 KB
README	10/6/2024 7:42 PM	Markdown Source File	7 KB
ToDoApp.sln	10/6/2024 11:31 AM	Visual Studio Solution	2 KB

6. Setting Multiple Startup pada visual studio, agar tidak menggunakan dua window untuk running. Karena aplikasi ini bersifat monolith. **Disarankan untuk jalan terpisah antara BE dan FE (Single)** untuk menghindari miss socket

Pilih Multiple, dan set action ke Start

7. Jika anda ingin menggunakan docker, silahkan buka terminal, lalu ketik pada command prompt “docker-compose up —build”

```

PS D:\Test Insura\ToDoApp\ToDoApp> docker-compose up --build
time="2024-10-06T23:05:36+07:00" level=warning msg="D:\\Test Insura\\ToDoApp\\docker-compose.yml: the attribute `version` is obsolete
, it will be ignored, please remove it to avoid potential confusion"
[+] Building 31.0s (36/36) FINISHED

=> => resolve mcr.microsoft.com/dotnet/aspnet:8.0@sha256:30d8619d9a4f68508d9b17fc2088e857e629d3f9ceaaaf57c22d6747f7326d89e
=> [todoapp-api internal] load build context

```

Tunggu Hingga Selesai seperti dibawah. Jika container telah berhasil di create aplikasi anda sudah bisa running. Buka docker lalu open browser pada host yang tersedia

```

[+] Running 2/2
✓ Container todoapp-todoapp-api-1 Recreated
✓ Container todoapp-todoapp-ui-1 Recreated
Attaching to todoapp-api-1, todoapp-ui-1

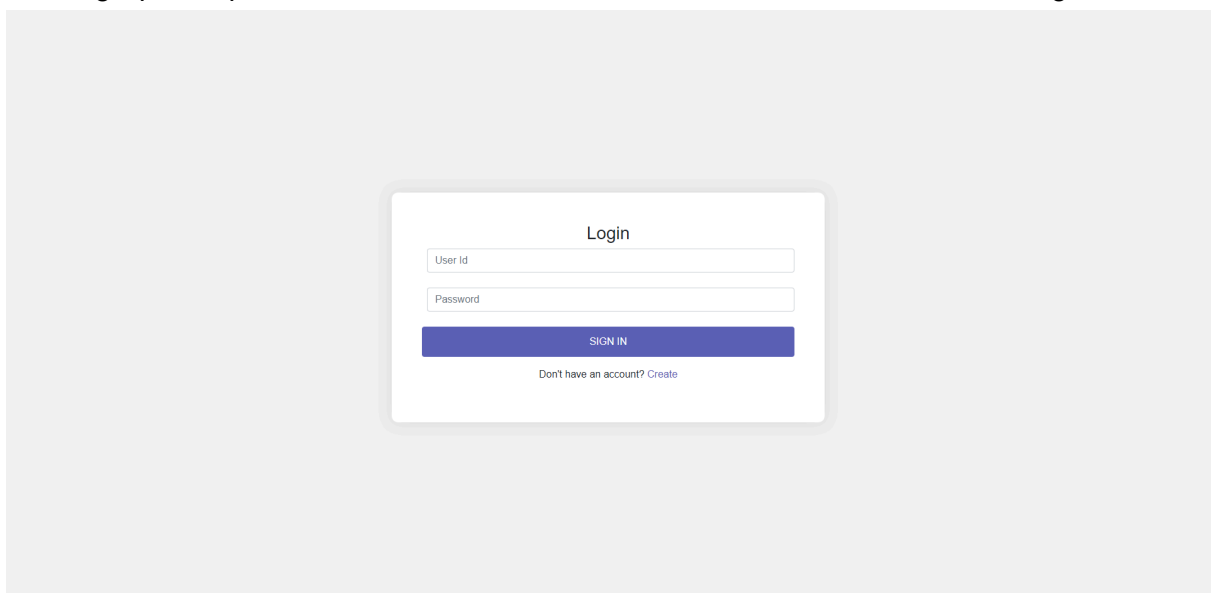

```

Buka Docker Desktop, dan lihat apakah sudah running

<input type="checkbox"/>		todoapp		Running (2/2)	N/A	1 second ago	  
<input type="checkbox"/>		todoapp-ui-1 ed99759fb649	todoapp-todoapp-ui:<none>	Running	8081:80	N/A 1 second ago	  
<input type="checkbox"/>		todoapp-api-1 a4b089019c79	todoapp-todoapp-api:<none>	Running	8080:80	N/A 1 second ago	  

Cara Menggunakan Aplikasi

1. Running Aplikasi pada Visual Studio atau Docker. Maka akan muncul halaman login

Jika anda belum memiliki akun, silahkan register.

A registration form titled "Register" with three input fields: "User Id", "Password", and "Name". Below the fields is a blue "REGISTER" button. At the bottom, there is a link: "Already have an account? [Login](#)".

Disini saya telah memiliki akun yaitu dengan userId **“testUser”** dan password **“testPassword”**

A login form titled "Login" with two input fields: "testUser" and ".....". Above the fields is a red error message: "Error! Invalid credential". Below the fields is a blue "SIGN IN" button. At the bottom, there is a link: "Don't have an account? [Create](#)".

Jika salah akan muncul pop-up diatas berdasarkan handling error dan response dari Backend

2. Setelah Login maka akan masuk ke halaman utama

Add New ToDo

<div>PreviousNext</div>					

3. Silahkan tambah data, edit, cancel atau delete data Todo List nya. Semua data yang sudah di input bisa di reverse ke status sebelumnya. Sesi ini berjalan secara Realtime tanpa anda harus melakukan klik button save.
4. Untuk menghindari timeout data karena terlalu banyak, saya menggunakan sistem clean code agar tidak banyak proses yang berjalan dan menggunakan metode pagination. Setiap satu page akan di batasin maksimal 5 data, data selanjutnya akan masuk ke halaman berikutnya.
